

HMK® P15 Porcelain Tile Care

For polished, honed & textured surfaces.

Cleans and protects the surface and supports the existing impregnation in one easy action.

HMK® P15 is a mild PH neutral concentrated cleaner with highly active ingredients that clean and protect honed, polished, textured and glazed porcelain tiles. P15 has been specially developed to enhance the appearance of porcelain wall and floor tiles and contains special ingredients that enrich the colour and structure of the surface. If used regularly, a resistance to stains is developed and the tiles will become easier to clean. Its water-soluble ingredients also prevent the build up of film usually caused by soap residue.

Instructions: For regular cleaning and maintenance add approx 25-50 ml for every 10 litres of clean water and mop the surface as usual wringing the mop regularly. When the water becomes dirty replace it with the same solution of P15 and clean water. Do not re-mop or rinse areas once cleaned. Use P15 daily in commercial areas and once or twice a week in residential areas. For larger areas P15 can be applied and buffed using the HMK® Z202 Polishing-Vac or a floor machine with a white/tan polyester pad at 900-1500 rpm.

Warning: Chemical product. Keep out of the reach of children.

Packaging: 12 x 1 litre bottles/box; 4 x 5 litre cans/box; 2 x 10 litre cans/box.

Storage: Store in a cool place.

Testing: Always test the product in an inconspicuous area to evaluate suitability, coverage and performance. Do not use the product in temperatures below 12 and above 25 °C.

Limitation of liability: The liability of HMK® Moeller Stonecare for defective products and any claims for damages whatsoever is limited to the purchase price of the products. HMK® Moeller Stonecare shall not be liable for any consequential damages. No other warranty or representation is made or implied.
